

How to use the Availability feature

You can now give and update your availability via your mobile in just a few easy clicks!

1. Click the Availability option on the homepage.
2. Using the calendar displayed, select the date you wish to provide availability for.
3. Select the types of shifts you are available for that day e.g early, late, long day, night.
4. If you have already provided preferences you can simply provide the shift type you would like to work and press confirm availability. If you would like to provide availability for a specific hospital, you can do so by selecting the Hospital from the drop down menu and writing the hospital(s)/ward(s) you would like to provide availability for in the preferences box below. You are free to list as many Hospitals/Wards as you wish.

5. To confirm the availability, click:
